

island cruising concept

a new way of boating

A soothing alternative to sailing
monohulls and catamarans
with high sustainable standards

GROUP  BENETEAU

BRINGING DREAMS TO WATER

Step on board and free your mind

If what you like on a sailboat is the silence and the slow pace and, on a catamaran, the huge space and wish, at the same time, to handle your boat easily, The island cruising is for you. Spacious, stable and respectful of the environment, he can accommodate up to 8 persons.

Wide open living space

When you step on board, the space is free of obstacles and wide open.

The layout has been carefully thought to offer the maximum connection with nature as well as an optimized comfort and circulation.

Designed as a "Pool house" with an outdoor kitchen, a dining table and multiple lounging areas space, you will enjoy the brightness.

Platforms at the back and unfolding terraces, on each side of the boat, expand the space and give you easy access to the water.

Enjoy comfort and soothing moments at anchor and during navigation

The journey from one island to the other
is part of the enjoyment.

Thanks to the hull design you will benefit
from permanent stability.

The transition between a quite mooring
and navigation will be seamless allowing
anyone to keep on doing the same
activities - cooking, eating, lounging.

The large open space will give this
sensation of living outside whilst being
protected from the sun. The same space
can be actually enclosed for more privacy.

Quiet and eco-friendly cruises

When devising the technical specifications, all priorities were put on **sustainable choices**, providing comfort during navigation and at anchor.

The electric propulsion guarantees perfect silence when cruising from one island to the other.

On top of production methods that reduce greatly the carbon impact, the usage impact is, as well, highly optimized and completely stress free.

- **Solar panels brings 30% to 50% of the energy requirement.**
- **Autonomy of the boat with electric propulsion has been adjusted to match with most cruises.**

You will travel easily from one island to the other with a full electric range for more than **2,5 hours at 7kts**. The embedded software will assure a stress-free energy management. And, of course, a propulsion back-up is provided with the generator giving a range of 250NM at 7kts.

The layout and the technical choices
have been carefully thought to provide a unique experience

OUTSIDE

the cockpit offers an amazing and open living space.

INSIDE
